

Cavity Free at Three Timeline

Cavity Free at Three (CF3) improves the oral health of Colorado's children and pregnant women by teaching medical providers how to incorporate preventive oral health services into prenatal visits and well child visits. CF3 is recognized as an evidence-driven program housed at the Colorado Department of Public Health and Environment (CDPHE). The timeline below illustrates the typical process for partners from the initial request until training follow-up is completed. The CF3 team is always available as a resource for trained practices.
